## 01

### Changes in statistics of this book according to the revision of the energy balance

- The Korea Energy Economics Institute (KEEI) has completely revised Energy balance, which serves as a framework for producing energy statistics on energy supply and demand. The revised energy balance has been approved as the new method for compiling energy statistics (Oct.17, 2022).
  - Due to its partial modifications since its establishment in the 1980s, the existing energy balances (hereinafter referred to as the previous energy balance) had limitations in accurately reflecting the complex and diversified energy supply and demand situation in recent years.
  - Accordingly, the KEEI has established revised energy balances that incorporate international standards (IEA standards) while adopting a structure and compiling methodologies that can most realistically reflect the energy supply and demand of the country.
  - The revised energy balances address the issues of the previous energy balances by adding and disaggregating energy commodities and energy flows in a manner that adequately reflects the reality, thereby enhancing the accuracy of the statistics.
  - The revised energy balances comprise two types of balances: extended balances, which offer a detailed information of the supply and demand flows of energy commodities over a one-year period, and simple balances, which are aggregated monthly to provide a rapid assessment of the supply and demand flow of energy commodities.
    - Previous energy balances: 29 energy commodities, 41 energy flows
    - Revised energy balances (extended): 58 energy commodities, 88 energy flows
    - Revised energy balances (simple): 41 energy commodities, 48 energy flows
- With the approval of the revised energy balances, KEEI has incorporated the statistics compiled using the revised energy balances in the Monthly Energy Statistics Report for Dec. 2022 and the Yearbook of Energy Statistics for 2022.
  - The Monthly Energy Statistics Report and the Yearbook of Energy Statistics are compiled in the form of simple energy balances to ensure timeliness and enhance users' comprehension of the energy statistics.
  - Also this book is compiled in the form of simple energy balances.

02

Figures in this book are obtained from related agencies and institutions. And on the data source, see the notation in the table.

---

03

The data can be revised by the agencies and institutions concerned.

---

04

From 2007, figures are based on revised calorific value every 5 years.

---

05

Abbreviation

|       |                             |
|-------|-----------------------------|
| TPES  | Total Primary Energy Supply |
| TFC   | Total Final Consumption     |
| GDP   | Gross Domestic Product      |
| Pop.  | Population                  |
| mil.  | million                     |
| bil.  | billion                     |
| tril. | trillion                    |
| Cons. | Consumption                 |

| e | Estimate     |

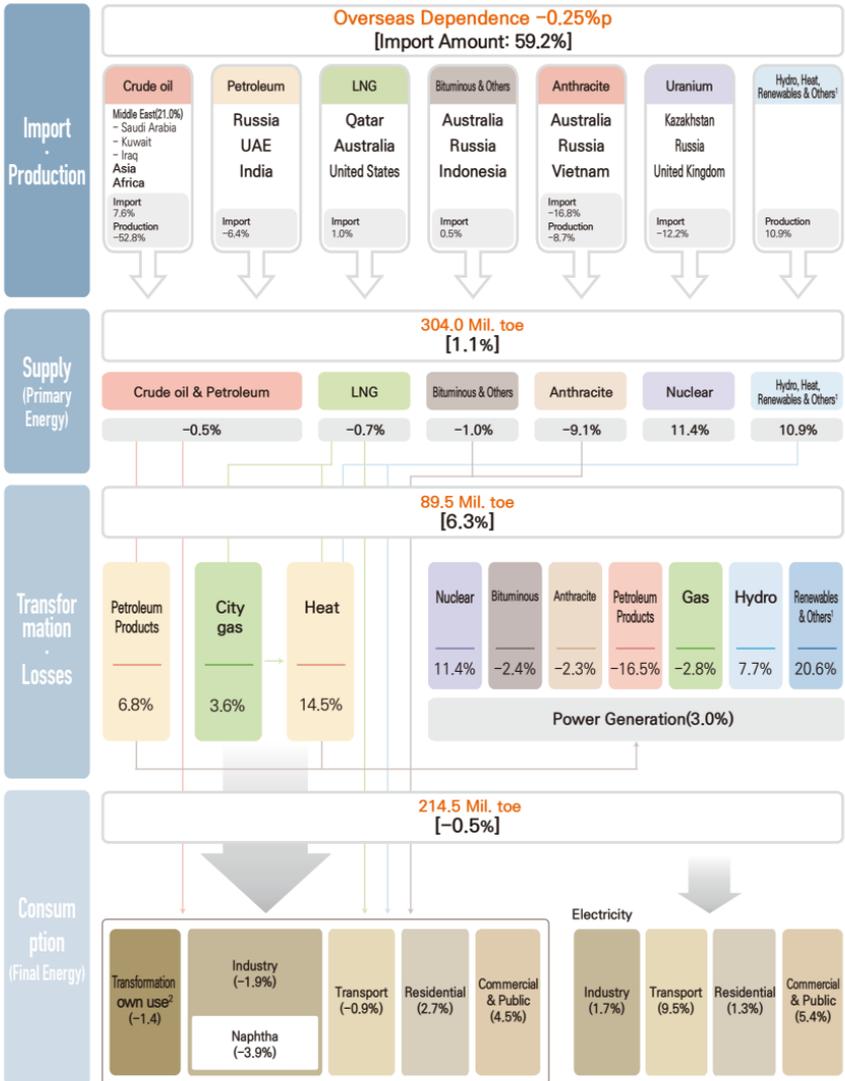

# 2022 Energy Flow

## Energy Flow

1. Renewables & Others: Biofuels and waste, Geothermal, solar, etc. Other sources

## ◦ Energy Flow (Year-Over-Year)

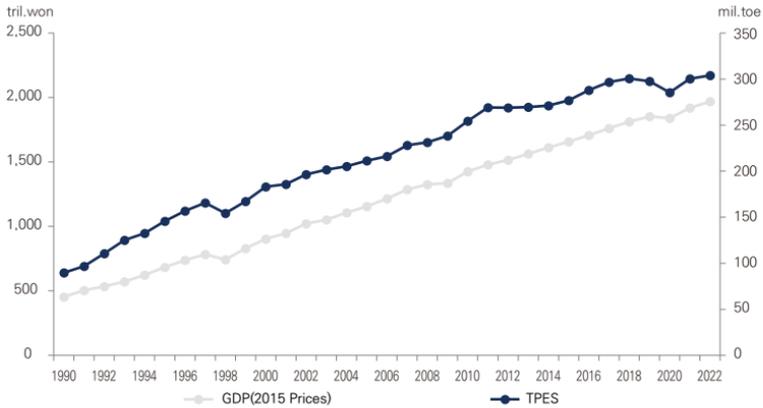

2. Transformation own use (energy industry own use) is distinct from the transformation process because it is not converted into other energy commodities and is not included in the final consumption, which is energy consumption for industrial activities.

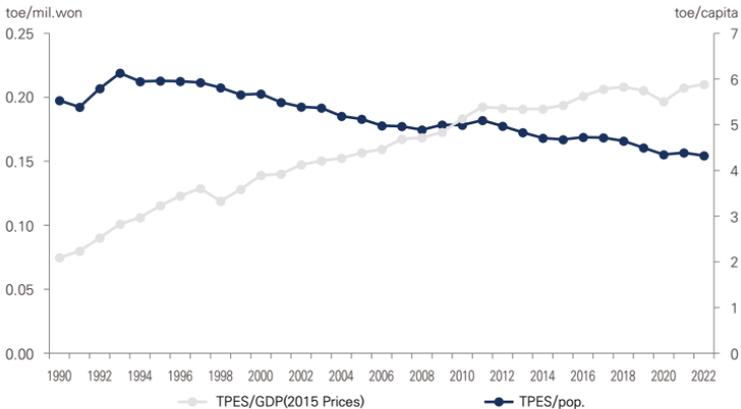

1. Major Energy Indicators
2. Transformation
3. Energy Production, Imports & Exports
4. Total Primary Energy Supply
5. Total Final Consumption

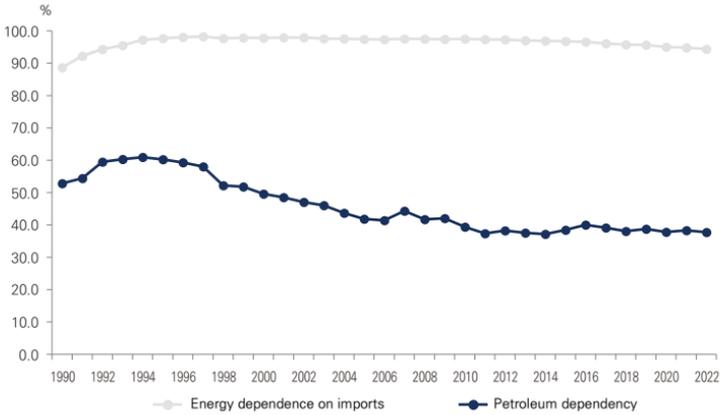

## ○ Trends in TPES and GDP

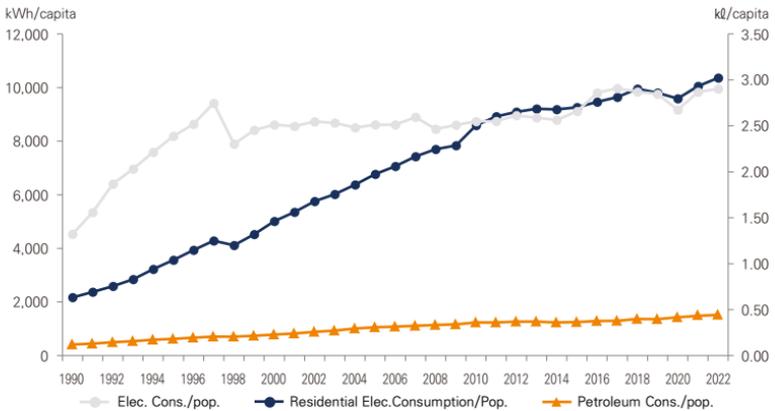

## ○ TPES per Capita and GDP

## ○ Energy Overseas Dependence and Petroleum Dependence

## ○ Electricity and Petroleum Consumption per Capita

## 1. Major Energy Indicators

|      | Population <sup>1</sup> | GDP (2015 prices) |                 | Total Primary Energy Supply(TPES) <sup>2</sup> |                 | Total Final Consumption(TFC) <sup>2</sup> |                 | CO <sub>2</sub> Emissions |                 |
|------|-------------------------|-------------------|-----------------|--|-----------------|---|-----------------|---------------------------|-----------------|
|      | (thou. person)          | (bil. won)        | Growth Rates(%) | (mil. toe)                                     | Growth Rates(%) | (mil. toe)                                | Growth Rates(%) | (mil. tCO <sub>2</sub> )  | Growth Rates(%) |
| 1990 | 42,869                  | 454,146           | 9.9             | 89.7   | -               | 71.1                                      | -               | 231.8                     | 14.1            |
